Continuum Health Partners Selects DoseMonitor 2.0 as a Systemwide Radiation Dose Monitoring Solution

Scottsdale, Ariz., September 6, 2012 – PHS Technologies Group LLC, a unit of PACSHealth LLC and developer of software that monitors patient exposure to ionizing radiation, today announced that Continuum Health Partners, a four-hospital system in New York City, has signed an agreement to adopt its DoseMonitor® 2.0 software solution to monitor radiation dosage for its medical imaging procedures.

Mike Battin, Chief Operating Officer of PACSHealth, said, “Monitoring radiation dose when performing needed imaging tests is a priority in the medical community. DoseMonitor 2.0 offers an effective tool to monitor each patient’s dose history so healthcare professionals can make the best patient care decisions and hospitals can ensure compliance with increasingly stringent regulatory requirements.

“We are pleased that Continuum Health Partners has chosen to join our growing list of DoseMonitor users.”

DoseMonitor is a single-server web-based software application that automates dose data collection and reporting, including direct integration into the RIS, EMR and American College of Radiology’s Dose Index Registry, eliminating time consuming manual steps and reducing input errors.

Its capabilities include:

- Support for computed tomography (CT), mammography, direct radiography (DR), interventional radiography and cardiac angiography.
- Advanced reporting capabilities, including dose by technologist by procedure, dose by physician by procedure, mammography reporting (organ and mean glandular dose) and age range support for alerts and notifications.
- Intelligent patient search, including search by name, partial name, medical record and/or accession number.
- Support for VMware®-based implementations, enabling hospitals to “virtualize” hardware on an existing server, reducing the need for new hardware and decreasing the total IT effort to implement the solution.

2-2-2 Continuum Health Partners Selects DoseMonitor 2.0

About PHS Technologies Group LLC

PHS Technologies Group LLC is a division of PACSHealth, LLC, a medical software development company based in Scottsdale, Ariz. that develops software systems for medical imaging technology. PHS Technology Group is committed to helping the medical community reduce patient exposure to ionizing radiation through advanced solutions that enable hospitals to manage patient radiation dose and comply with regulatory requirements and industry guidelines, while increasing efficiency and reducing cost.
